The Raptor 390 Solarium

A beauty to behold, the 38'88" Raptor 390 Solarium is a true statement upon the seas. Designed with functionality, comfort and all-round luxury in mind. This vessel is sure to put a smile on even the most experienced owner every time you step onboard. For family outings, sports activities or entertaining friends and colleagues, the Raptor 390 Solarium excels. On top of the already functional standard equipment, you can opt to upgrade your vessel with a wide range of luxury appointments, from kitchen appliances through to teak wood decking and finishing.

The winning formula

The Raptor 390 Solarium provides an incredibly beautiful exterior, with stunning interior layout, and industry leading features throughout

.If you're looking for the perfect luxury center console you've just found the answer to your dreams! The Raptor 390 Solarium will seduce you with her pedigree design, tempt you with ample amenities, and bound you over with her exceptional sea-keeping abilities.

Interior

The console includes all the modern amenities you would expect from a boat of this caliber; fully enclosed head with standing height for even the tallest of adults, large storage areas, modest kitchen, and a full queen size bed! Comfort can be provided by the onboard air conditioning system. Accordingly, you'll thoroughly enjoy your time on water with your Raptor 390!

Exterior

Out on deck the spacious interior provides distinct social zones allowing the entire group of family and friends to find their own space. The enormous sun pad and seating area at the bow, the triple pilot seating at the helm, and aft deck area with lateral bathing door – this is really something to behold!

Performance

Power can come from as little as 2x 300hp outboards, which thanks to the 375's perfect hull form, still provides performance to impress. Maximum power rating as high as 3x 450hp outboards give the 390 stunning performance to really thrill!

All this, and every boat is backed by Raptor's 5 year hull & deck structural warranty!

Measurements

Overall Length: 11,85 m / 38'88"	Weight: 5,500 kgs / 12,125 lbs
Maximum beam: 3,45 m / 11'32"	Transom V Angle: 24.5 °
	Fuel Tanks Capacity: 200 L / 53 US gal
	Fresh Water Tanks Capacity: 1,000 L / 264 US gal

Standard Equipment

- All Standard Equipment Items are Included Free Of Charge
- Stainless Steel Water & Fuel Supply Nozzle
- Bilge Pump Floating Switch
- Automatic Bilge Pump
- Foldable Stern Seat
- Transfer Pump
- Compass
- Stern Shower
- Coolers / Ice Compartment
- Stainless Steel Retractable Cleats 8"3 Step
- Retractable Stainless Steel Ladder
- Upholstery
- Self-draining deck linked with grey water
- Cockpit Side in Teak Finishing
- Engine Room Opening with Gas Springs
- Courtesy Lights
- Navigation Lights
- Electric Panel
- Acrylic windshield
- Stainless Steel Water Outlets
- Inspection Ports
- Sink with Faucet
- Side Fenders Compartments
- Side Rod Holder
- Side Rod Rack
- Stainless Steel Water Drain 12 V Outlets
- Cabin & Toilet Hatches
- Cabin Height 1.80m / 5'90" Cabin's Queen Bed
- Cabin's Wardrobe with Sink
- Toilet with Shower
- Toilet with Electric Flushing System
- Stainless Steel Recessed Bow Bimini
- Teak Stern Table

Optional Accessories

- Optional Accessory Prices Available Upon Request
- Stainless Steel Anchor 10 kgs + 40 M calibrated cable 8 mm + distorter
- Electric winch 1000 W
- Battery 150 ACD player + 4 Marinized Speakers
- VHF Radio with Antenna
- Boat nylon cover
- Fish Bait Box (Livewell)
- External TV Antenna
- Headlight with remote control Flaps with digital pane
- Hull Painting
- Stainless Steel frame T – Top with Bimini in Fiberglass
- Stainless steel rod holders in the Top (Set of 05)
- Wooden Bert (For Container Transport or Display)
- Teak – Lateral deck swim door
- Teak – cockpit + bow
- Teak – stern
- Synthetic Teak – lateral deck swim door
- Synthetic Teak – cockpit + side path + bow
- Synthetic Teak – stern

Structural & Finishing Quality

The products of the Raptor® line are constructed with manual lamination (Hand Lay-up), which allows a greater care and supervision in the application of the materials. Multiaxial (Biaxial and Triaxial)

fabrics are used so that the different layers and directions of the frames offer greater load capacity and structural reinforcement. In addition, every deck and internal parts receives PVC foam (Sandwich known as Divinycell) which leaves the structure highly resistant and lightweight. Isophthalic gel with UV protection. Layer Skin coat with chemical barrier to prevent contamination on contact with water and Coremat fabric that offers a uniform finish. An important highlight in the manufacturing process of a Raptor® is that the stringers are filled with polyurethane foam, which makes all Raptor® boats unsinkable

The internal fitout of the Raptor® boats receives furniture made with high quality navy plywood and coated with special laminate for naval use and stainless steel fittings. Depending on the model, the center tables may be in wood or teak. The models that has tables with height adjustment (for bed) are pneumatic driven, the others are removable in a functional way. The external tables are made in teak for better resistance to the weather conditions. Kitchens and toilets has stainless steel or ceramic sink (depending on model) with quartz stone top (known as corian®). Upholstery with D33 foam

on every boat lined with nautical courvin (on sofas) or fabric (on mattresses and internal cushions that also has higher thickness). Stainless steel 316 hardwares and fittings to prevent corrosion. LED lights that reduce battery consumption and do not heat up. Tempered glass on windshields and windows.

Lamination & Stringers

All Raptor boats are build with latest technologies and highest grade materials available, such as cutting edge core composites, details such as core-mat hull isolation, antioxidants electrical wires, stainless 316L hard tops and bow rails , par-lock screws and nuts, ISO 9001 certified fuel tanks, retractable stainless steel cleats, all box cover with counter-mold finishings, stainless steel springs gas. Projects developed by renowned naval architects and engineers designers such as Donald Blount and others.

Lamination uses only materials with quality certificates imported from the USA and EU, gelcoat with UV filter for sunlight protection, polyurethane filled stringers and crash boxes, isofitalic resins, hand-layup/ infusion processes resulting unparalleled strength and rigidity. After assembly all units pass thru strict quality control. The Raptor® boats have passed all rigorous test such as wind&wave resistance and RSG CE norms to receive CE and RINA Conformity Certification attesting to the quality of design, materials and finish required to meet strict international maritime standards of construction and security
